

PHILIPS

Efficia

Patient monitoring

Because **budget** and **quality matter**, the choice is **Philips Efficia**

Helping **you** help
your patients

Providing you quality without compromise

Because both budget and quality matter, the answer is Philips Efficia patient monitoring. **In tune with your needs**, we offer a value range of patient monitors.

Time-tested physiological measurement algorithms and essential functionality are now within your reach. With your workflow in mind, Efficia monitors are designed

to be both portable and intuitive to use. You can **access most functions in three clicks or fewer**.

With Efficia patient monitors, you can be confident you're delivering efficient, quality care – all while staying within your budget. **It's the best of both worlds: the functionality and innovation you expect of Philips, and the value you need.**

The real return on your investment in patient monitoring is in the quality of your patient care. And that means you need monitoring that helps you deliver that care.

Fifty years of experience in patient monitoring has allowed us to develop a close understanding of clinical workflows and staff needs. With these insights, we've designed Efficia patient monitors to be very easy to use, so you can provide fast and efficient patient care.

Our intuitive Efficia user interface helps you get up and running quickly. Even clinicians with minimal experience are ready to use monitors. Keeping training time and effort low is especially important in areas with temporary staff or high turnover. And when you're comfortable and confident using equipment, you can spend more time caring for patients.

Containing your costs, not your capabilities

You may be feeling the constant pressure of meeting clinical demands on a tight budget – or the pressures of the current economic climate. Either way, you cannot compromise the quality of your patient monitoring and the information you need for patient management decisions.

Now there's no need for a trade-off. Efficia patient monitors use the same Philips physiological measurements that already help monitor over 200 million patients every year. You'll get the same quality of performance you may already

know from our existing line of monitors. Efficia patient monitors focus on core monitoring functionality. This means you can access the features you need, at a purchase price and total cost of ownership you can justify.

We understand how important ongoing costs are to your overall return on investment. From the outset, we design and create products with a long useful life.

Work with us to define your needs and access various financing alternatives

Stay confident with warranties that help you keep low support costs and no unplanned capital costs for breakdowns

Get quality local support from Philips Customer Services, in line with your in-house capabilities and budget

The Efficia Patient Monitors

- Time-tested physiological measurements relied on for over 200 million patients every year

1. Please check availability with your Philips sales representative
 2. Masimo SET[®] and Masimo rainbow[®] measurement parameter options are also available
 3. With tool
 4. Efficia CM120 with two 9 cell batteries, brightness 8. Battery life will vary by model

“ The new Philips Efficia patient monitor has some great features such as its touchscreen and screen resolution as well as being within my price range. I would see it being suitable for use in the general ward setting where you don't need to connect to a central station. ”

Jay Mangat
Medical Physics Clinical Scientist
